

DIGITAL HOT AIR WELDING TOOLS WIN 1600D

PRODUCT INFORMATION

Digital Hot Air Welding Tools WIN 1600D

This is an intelligent manual hot air tool suitable for use on the construction site. It is mainly used for welding various hot melt plastics such as PE, PP, EVA, PVC, TPO, PVDF, etc. It can also be used for hot-forming, heat shrinking, and drying, igniting and other operations. In addition to the advantages of Lesite hot air welding gun double insulation, two-pole overheating protection, constant temperature control, and continuous temperature adjustment, the visualized real-time temperature display makes it easier for users to adjust the appropriate temperature and improve work efficiency.

Small orders accepted.

To meet small batch customized services.

Welding nozzles of different specifications such as round quick welding nozzles, triangular quick welding nozzles, spot welding nozzles, etc., can be freely matched and purchased according to the needs of use To meet the voltage requirements of 120V and 230V different countries and EU standard, US standard, UK standard plug requirements.

We can supply our clients with high quality products and solutions and excellent service.

ADVANTAGES

Closed Loop Control – Accurate temperature control

This hot air gun is equipped with a built-in thermocouple, using closed-loop control to accurately control the heating temperature of the hot air gun even if the voltage and ambient temperature change, the hot air gun can automatically adjust to the set temperature

Temperature display – Set temperature and Actual temperature – dual display

LCD displays the Set temperature and the Actual temperature at the same time, which is convenient for the operator to observe the real-time working temperature of the hot air gun at any time.

SPECIFICATIONS

Model	WIN 1600D
Voltage	230V /120V
Power	1600W
Temperature adjusted	20~620
Air volume Max	180 L/min
Air Pressure	2600 Pa
Net weight	1.05kg
Handle Size	Φ 58 mm
Digital Display	Yes
Motor	Brush
Certification	CE
Warranty	1 year
